What is this product?

Type

This product is a UCITS.

The fund has no termination date. However the Management Company may, at its discretion, decide to terminate or merge the fund or its unit series.

Objectives

Storebrand Global Kreditt IG is a fossil free fixed income fund that aims to achieve long-term excess returns by investing in corporate bonds on the global bond market.

The fund invests in bonds issued by international companies, but excludes investments in the energy sector and thus refrains from investing in companies whose main business is related to oil and gas extraction and other related activities. The fund also refrains from investing in companies that have more than 5 per cent of their revenue from the production and/or distribution of fossil fuels, weapons, alcohol, gambling or pornography or that have large fossil sources. The lowest acceptable credit quality for a single investment is BBB-at the time of investment. The fixed interest rate period is to be the same as that of the benchmark +/-4 months. The manager attempts to select the most attractive securities based on his/her own analysis. The fund's investments are for the most part currency hedged to NOK.

Dividends and other income received by the fund are reinvested and included in the unit value. At year end the fund's taxable income are

distributed to the unit holders. Distributions from the fund are normally reinvested into additional units, but unit holders may choose cash dividends.

Derivatives may be used to ensure less expensive or more efficient management.

Intended retail investor

The fund offers a diversified portfolio of securities for investors interested in wealth accumulation, pension savings or similar investment purposes.

The recommended holding period of the fund is at least 3 years assuming the fund is the sole or major holding of the investor. The recommended holding period is primarily based on the historical volatility of the underlying investments and is not directly applicable if used in a portfolio based on the investor's risk profile. The fund is not intended for short term speculation purposes.

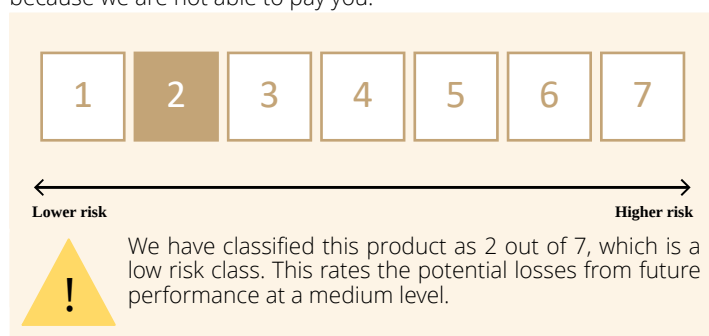

The fund is intended for investors who accept and understand that the value of the fund is directly linked to the value of underlying investments, will fluctuate over time and that the invested amount can be lost entirely or partly. Investments in the fund require no specific knowledge of the financial market or instruments from the investor.

The Fund's Depositary is J.P Morgan SE - Oslo Branch.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Other risks materially relevant to the PRIIP not included in the summary risk indicator: Event risk, liquidity risk, operational risk, counterparty risk, derivatives risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future. The unfavorable, moderate and favorable scenarios occurred for an investment between 2011 – 2021.

Recommended holding period:		3 years	
Example Investment:		100 000 NOK	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum			
Stress	What you might get back after costs	86 490 NOK	84 790 NOK
	Average return each year	-13.51%	-5.35%
Unfavourable	What you might get back after costs	86 490 NOK	91 850 NOK
	Average return each year	-13.51%	-2.79%
Moderate	What you might get back after costs	103 680 NOK	111 610 NOK
	Average return each year	3.68%	3.73%
Favourable	What you might get back after costs	109 510 NOK	119 220 NOK
	Average return each year	9.51%	6.04%

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Storebrand Asset Management AS is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary. In the event of our insolvency, the Fund's assets in the safekeeping of the depositary will not be affected. However, in the event of the insolvency of the depositary, or someone acting on its behalf, the Fund may suffer a financial loss. This loss will not be covered by any investor compensation or a guarantee scheme. However, this risk is mitigated to a certain extent by the fact that the depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure to properly fulfil its obligations (subject to certain limitations).

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	669 NOK	2 174 NOK
Annual cost impact (*)	0.7%	0.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.4 % before costs and 3.7 % after costs.

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0.00% 3.00% maximum of the amount you pay in when entering this investment. These costs are already included in the price you pay.	0 NOK
Exit costs	0.00% 0% of your investment before it is paid out to you.	0 NOK
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.50%	501 NOK
Transaction costs	0.16%	163 NOK
Incidental costs taken under specific conditions		
Performance fees		

How long should I hold it and can I take money out early?

Recommended holding period: 3 years.

This fund has no required minimum holding period but is designed for long-term investment.

Subscription to and redemption of fund units can normally take place on all banking days with certain exceptions.

How can I complain?

In complaint matters investors should primarily contact the distributor of the fund. When the fund is distributed by Storebrand Asset Management, the investor should primarily fill in a complaint form at www.storebrand.no/asset-management.
