

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

CONVENTUM - Lyrical Fund, class B (LU0502882342)

a sub-fund of CONVENTUM

Management Company: Conventum Asset Management

Objectives and investment policy

Objectives

The aim of the sub-fund is to seek long-term capital gains by reducing the risk of losing the initial investment via the acquisition of financial instruments whose market value is significantly lower than their book value.

Investment policy

The sub-fund invests primarily in shares of American companies. The sub-fund may thus hold about 30 to 40 positions in different companies in more or less equal amounts, with the exception of certain companies which are considered as offering more potential. Investments are made without any sectoral restrictions.

The portfolio is actively managed using a discretionary approach without using a benchmark, based on the manager's analysis which is made using historical performance data and normal short-, medium- and long-term performance forecasts in order to establish the potential return of

each investment with regard to its market price and the estimation of its book value.

The currency of the share class is expressed in USD.

The investor has the right to redeem his shares on demand. The dealing in shares is carried out on each complete bank business day in Luxembourg. The attention of the investor is drawn to the fact that in exceptional circumstances, the possibility for the investor to request the redemption of his shares may be limited or suspended.

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

What does this synthetic indicator mean?

- The shares of class B are classified in category 7 because the value of the share may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.
- The risk category has been determined on the basis of historical data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the fund may shift over time.
- The lowest category does not mean a risk-free investment.
- Repayment of the initial investment is not guaranteed.

Which materially relevant risks are not adequately captured by the synthetic indicator?

- The market for securities issued by small- and mid-capitalisation companies is generally less liquid than the market for securities issued by large-capitalisation companies. This leads to a higher risk as certain subfund investments in the market for small- and mid-capitalisation companies may be temporarily unavailable for purchase or sale at fair value.
- The concentration of the sub-fund on a given country implies the risk that events concerning the given country may significantly and negatively affect the value of the whole portfolio of the sub-fund.
- Other risk factors, that an investor shall take into account with regards to his own situation and specific current and future circumstances, may exist.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment in the sub-fund is indicated in the corresponding section of the prospectus of the fund which is available at the Management Company and on the website www.conventum.lu.
